

Expert in Immunology since over 30 years, Interchim offers its know-how in Custom Services. Interchim provides a complete and high quality expertise from peptide synthesis to polyclonal and monoclonal antibody production, or purification, labeling, and any other complementary work.

Our goal : to achieve your goals !

Thanks to our large expertise, you do not need to ask several suppliers when several steps are required. We provide a global service. A unique interlocutor is dedicated to your project.

Prior to any requested custom service, a personalized study is elaborated for feasibility, pricing, lead time, and to help you in the choice of the best option.

Interchim guarantees total confidentiality about your project.
